Education

Rochester, MN **Rochester Community and Technical College** **2024 – 2027 (Expected)**

- **Major:** Double Major in Computer Science & Cybersecurity | **GPA:** 3.6 (three consecutive semesters at 4.0)
- **Honors:** Phi Theta Kappa Honor Society
- **Coursework:** Cybersecurity, Networking, Linux, Algorithms & Data Structures, SQL & Relational Databases, Computer Architecture, Discrete Mathematics

Certifications

CompTIA Network+ **CompTIA** **Earned Spring 2025**

- Industry-recognized certification covering network infrastructure, operations, security, and troubleshooting.

Cybersecurity Experience

Home Penetration Testing Lab **Self-Hosted Home Server**

- Run a personal home server as a penetration-testing lab, working from Kali Linux and practicing against a deployed DVWA.
- Use Nmap for network scanning, Burp Suite for web application testing, and Metasploit for exploitation.
- Implemented secure password storage for my file-sharing application using SHA-256 with a unique random salt per user, storing only hashes in MySQL.

Leadership & Involvement

Founder & President **RCTC Computer Science Club** **Fall 2025 – Present**

- Founded the club and lead all of its activities for ~20 members, personally teaching hands-on sessions across hardware, software, and cybersecurity, including a live SQL injection lab where members attacked a DVWA instance I deployed.

Student Senator **RCTC Student Senate** **Fall 2025**

- Served on the Governmental Operations internal committee and as the student representative on the Student Success external committee.

Student Panelist **Rochester Chamber of Commerce AI Panel (IBM)** **Spring 2025**

- Represented RCTC on an IBM-hosted student panel on artificial intelligence, engaging with local industry and community leaders.

Software Projects

Real-Time Distance Monitor with Audio Output

- Built a distance monitor from a VL53L0X time-of-flight sensor and Arduino Nano, connected over I2C.
- Wrote Arduino C++ firmware that streams live readings over serial, and a Python program that maps distance to audio pitch in real time.
- Documented pinout, wiring, and setup so anyone can reproduce the build.
  Utilized: Arduino C++, Python, pyserial, NumPy, sounddevice, I2C, Linux

Secure File-Sharing Application

- Built a Java application for private file sharing with password-protected accounts, backed by a MySQL database.
  Utilized: Java, MySQL, SQL

TCP Client-Server Messaging Tool

- Built a C++ client and server on Windows using Winsock TCP sockets (socket, bind, listen, accept, send, recv) to exchange messages over a network connection.
  Utilized: C++, Winsock, TCP/IP socket programming

Process Monitor (CLI)

- Built a Rust command-line tool that displays active processes and their real-time resource consumption.
  Utilized: Rust, process and resource monitoring, command-line interface design

RCTC Computer Science Club Website

- Designed and built a multi-page site with About, Leadership, Projects, and Resources sections, version-controlled on GitHub.
  Utilized: HTML, CSS, JavaScript, Git

Skills

Languages: Python, Java, C/C++, SQL (MySQL, SQLite), JavaScript, HTML, CSS
Embedded & Hardware: Arduino, I2C, sensor interfacing, serial communication
Security: Kali Linux, Nmap, Burp Suite, Metasploit, DVWA, TCP/IP socket programming, CompTIA Network+
Tools: Git/GitHub, Linux, LaTeX, Arduino IDE
